This Checklist reflects Command requirements for managers to prepare for and conduct internal reviews in the functional area of Space Control/Surveillance Operations. It applies to HQ AFSPC, 14th Air Force and 21st Space Wing.

SUMMARY OF REVISIONS

This checklist has been revised to convert AFSPCSIG90-2065 into the correct format.

1. References have been provided for each critical item. Critical items have been kept to a minimum and are related to public law, safety, security, fiscal responsibility, and/or mission accomplishment. While compliance with non-critical items is not rated, these items help gauge the effectiveness/efficiency of the function.
2. This publication establishes a baseline checklist. The checklist will also be used by the Command IG during applicable assessments. Use the checklist at [Attachment 1](#) as a guide only. Add to or modify each area as needed, to ensure an effective and thorough review of Space Control/Surveillance Operations.
